

Moiz Bookwala

Backend Developer

+91 8591465099 ▪ moizbookwala31@gmail.com ▪ GitHub ▪ LinkedIn ▪ Portfolio

Professional Summary

Information Technology student passionate about backend engineering and full-stack development with hands-on experience in FastAPI, React, Flutter and SQL databases. Winner of the Ignite 7.0 National 24-Hour Hackathon with experience building scalable APIs, modern web applications and production-ready software projects.

Technical Skills

Languages	Python ▪ JavaScript ▪ HTML ▪ CSS ▪ SQL
Frameworks	FastAPI ▪ React ▪ Next.js ▪ Flutter ▪ Tailwind CSS
Databases	PostgreSQL ▪ MySQL ▪ Firebase
Tools	Git ▪ GitHub ▪ Docker ▪ Linux

Education

Shah & Anchor Kutchhi Engineering College	2025 – 2028
Bachelor of Technology (B.Tech.) in Information Technology	CGPA: 9.0
K J Somaiya Polytechnic	2022 – 2025
Diploma in Computer Engineering	87%

Experience

Brand Bucket Softtech	Jun 2024 – Jul 2024
Frontend Developer Intern	Kalyan, Maharashtra
- Developed responsive web pages using HTML, CSS and JavaScript. - Built reusable frontend components and improved website responsiveness. - Worked collaboratively using Git and GitHub for version control. - Optimized layouts and fixed UI bugs to improve user experience.	

Projects

Trek Community Platform	Ongoing
FastAPI ▪ React ▪ PostgreSQL ▪ Docker	
- Developing a full-stack platform that enables organizers to create, manage and publish trekking events. - Building scalable REST APIs using FastAPI following clean backend architecture. - Integrating PostgreSQL database with a modern React frontend. - Implementing authentication, booking workflows and organizer dashboard.	

NGO Food Waste Management

Ignite 7.0 Winner

Flutter ■ React ■ Firebase

- Built a Flutter mobile application connecting restaurants, NGOs and volunteers to reduce food wastage.
- Developed a React web portal for NGO verification and administration.
- Integrated Firebase Authentication and Cloud Firestore for secure real-time data management.
- Won First Place in the Ignite 7.0 National 24-Hour Hackathon and received a 10,000 cash prize.

Inventory Management System

Python ■ FastAPI ■ MySQL

- Developed an inventory management system for managing products, suppliers and stock records.
- Designed REST APIs using FastAPI with complete CRUD functionality.
- Integrated MySQL database for efficient inventory storage and retrieval.
- Implemented scalable backend architecture for inventory operations.

Face Recognition Attendance System

Python

- Developed an automated attendance management system using facial recognition.
- Implemented secure liveness detection to improve attendance verification.
- Automated attendance recording and report generation.
- Designed a desktop interface for educational institutions.

Achievements

- **Winner – Ignite 7.0 National 24-Hour Hackathon** for building an NGO Food Waste Management platform using Flutter, React and Firebase within 24 hours.
- Awarded a **10,000 Cash Prize** after securing First Place among competing teams.
- Built multiple backend and full-stack applications using FastAPI, React, PostgreSQL, MySQL and Flutter.
- Actively learning scalable backend engineering, REST API development and modern software architecture.
